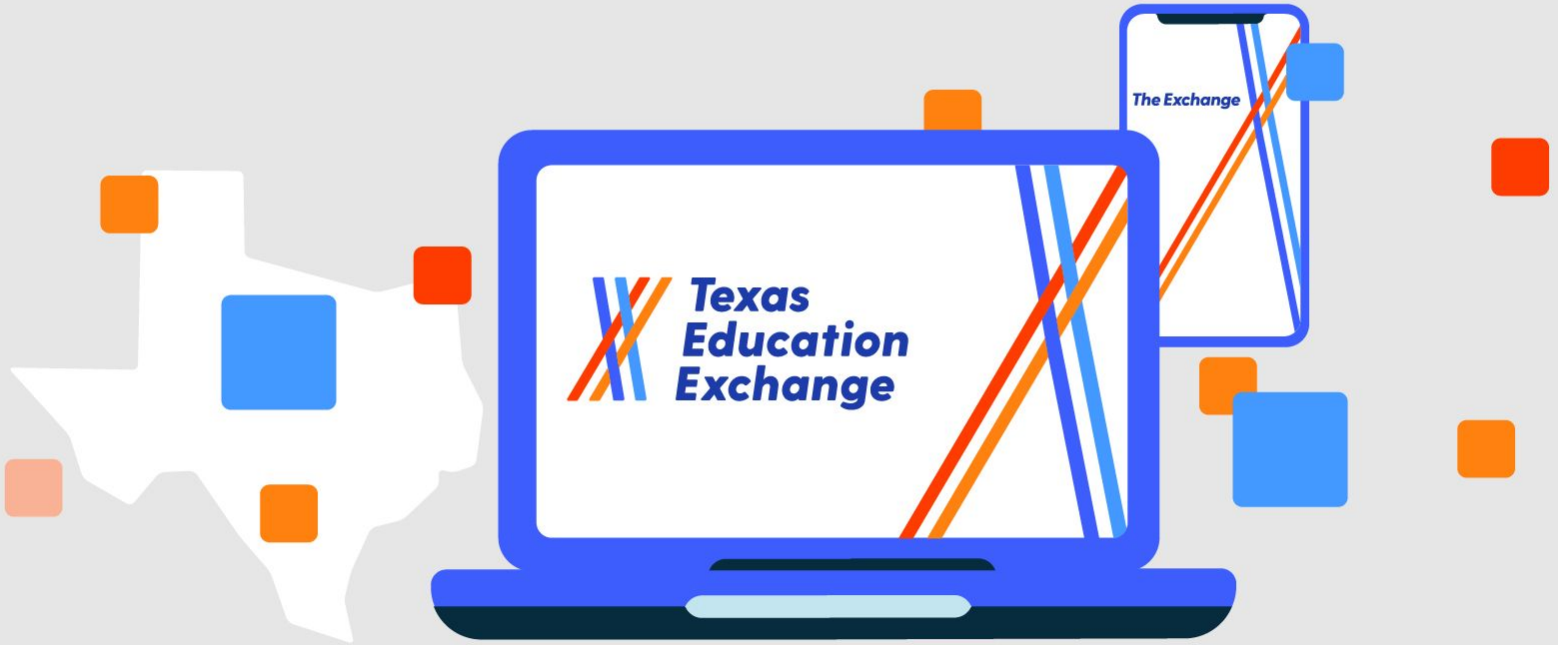
Put Better Data Tools in Your Teachers' Hands



DATA INSIGHTS DRIVEN BY COMMUNITY

FOR SCHOOL & DISTRICT ADMINISTRATORS

SECURE DATA FLOW

FOR EDUCATIONAL SERVICE CENTERS

edvise

The Exchange

AN ONLINE COMMUNITY TO DISCUSS, LEARN, AND SHARE

runway

rally

FOR TECHNICAL LEADS

FOR EDUCATORS

Educators miss opportunities to positively impact students

- Lack of **timely, relevant information.**
- Lack of **data flow between systems.**
- **Manual work** to input data, **manipulate** it between applications, and **compare** it to make sense of trends.

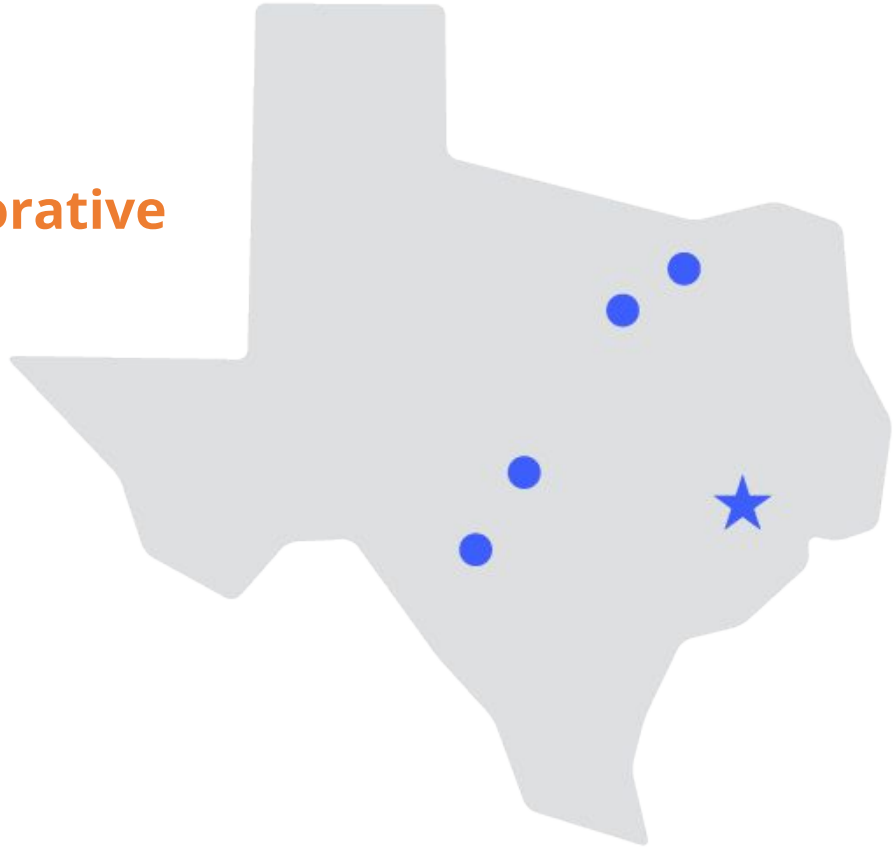
The Exchange is made *for* Texas *by* Texas

Five founding regions lead the
Texas Education Exchange Collaborative

With support from key partners

ed-fi ALLIANCE

Michael & Susan Dell FOUNDATION



The Exchange leverages the Ed-Fi Data Standard

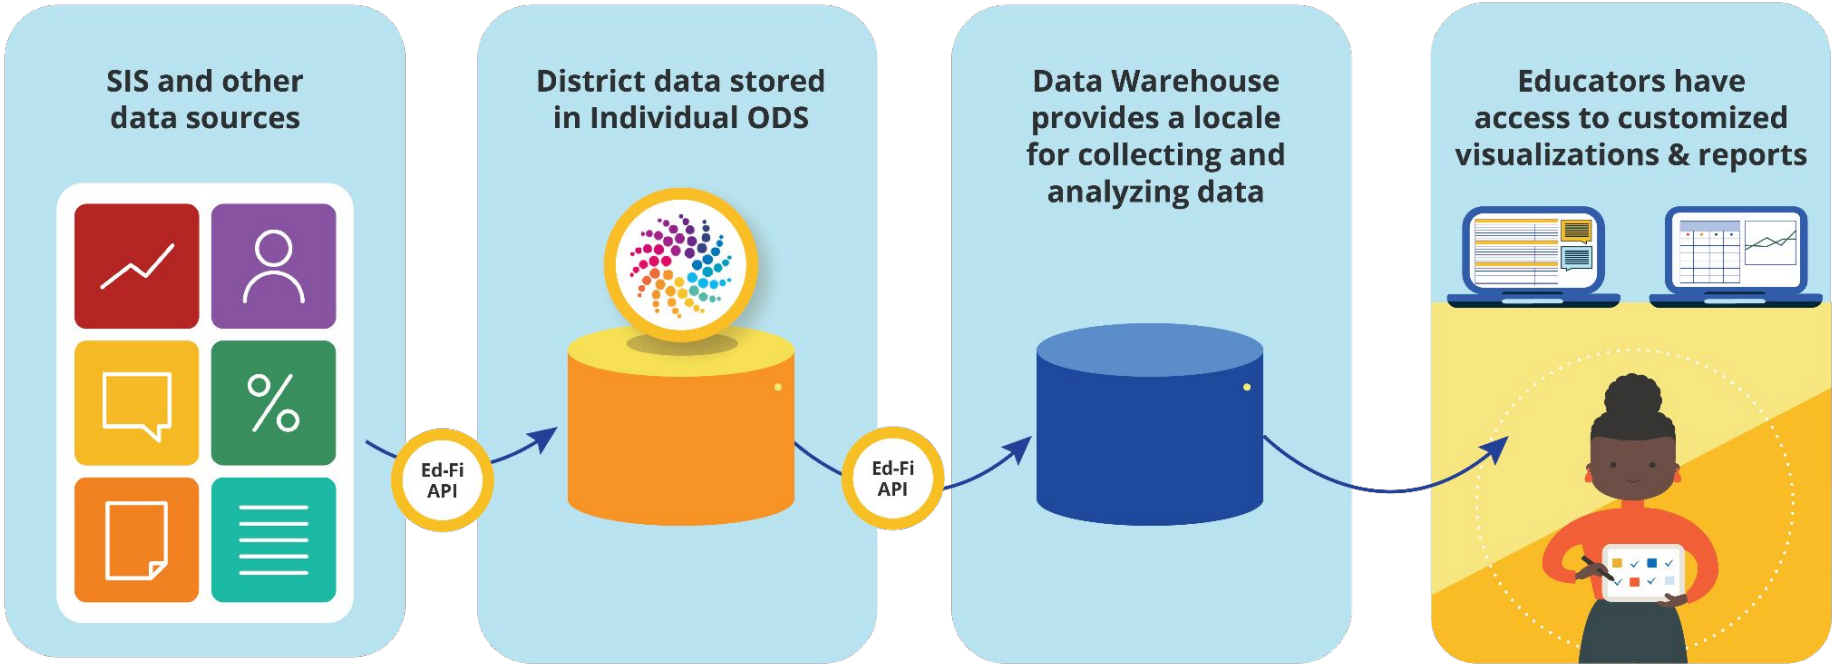
- Ed-Fi is a **data standard,** a set of rules that establishes a **unified structure** for educational data. It **seamlessly connects** data from different systems.

- The Exchange is working toward expanding that **common language across Texas** to include TSDS/PEIMS codes plus additional codes where they are needed. This will enable all “downstream” partners (e.g., vendors, districts and charter schools, regions, researchers) to work from a common language.

- Ed-Fi is **free** and **open source.**

- Ed-Fi also provides a **support community** with documentation and support forums so **users can share solutions.**

The Exchange architecture moves data securely & efficiently



Applications address Texas educators' biggest challenges

Challenges	Solutions
Outdated and erroneous data negatively impacts funding	**Data Health Check**
Educators spend hours logging into multiple systems to access data and do not have a clear, holistic view of student progress	**Single pane view of student programs and services**
Countless hours spent manually rostering lead to errors and delays	**Roster Relay**
Teachers wait weeks to receive essential data for transferring students, delaying differentiated instruction	**Student Passport**

Advantages of The Exchange

Security

- Controlled access to district data for regions & third-party applications
- LEA owns and controls their data

User access

- Central hub for all users to collaborate & access data tools through the online community
- Federation with district SSO to simplify access for educators

Data analysis and reporting

- Longitudinal data warehouse access
- Customizable data warehouse & business intelligence reporting
- Administrator dashboards
- Region-developed applications

Support

- Support & tooling to integrate data sources beyond the SIS
- Training & support from regional partners
- More robust administrative management features

The Exchange benefits districts, tech leaders, regions

This will help us know that we're looking at data equitably—apples to apples, not apples to oranges.

What's unique is the interoperability—at present, data is siloed in disparate sources. This will bring it all together.

More accessible data will make people's jobs easier. Everyone is overworked, so something that makes the day-to-day easier will get people interested.

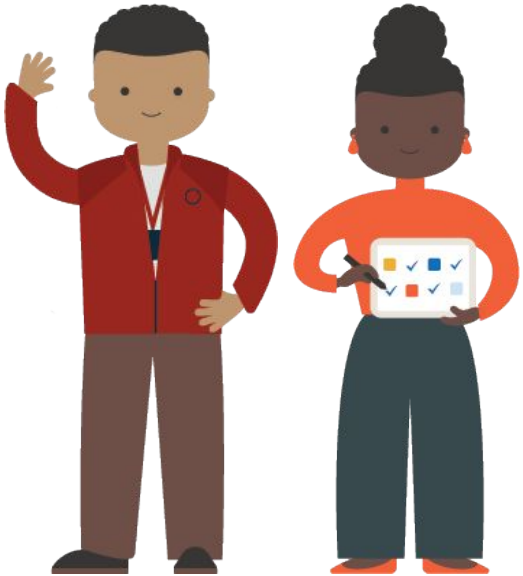
The Exchange can be a boon for small districts. It affords them quality data analytics to support teachers and students, which otherwise wouldn't be possible.

The Exchange benefits teachers

Removing lag and getting data into the hands of educators to drive their instruction.

The Exchange is made for humans—intuitive, easy to use, engaging, delightful.

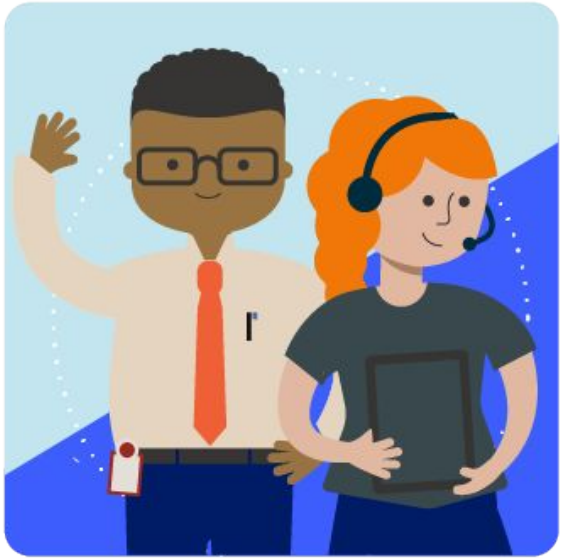
Hopefully [The Exchange] will allow teachers to spend less time managing these tools and more time with their students.



If teachers don't have to figure out how applications work together, they can give that extra time to students who need it.

The Exchange provides participants tools to efficiently manage data

- More **efficient** data standards alignment and integration
- Regions offer **wraparound services** enhancing data utilization, analysis, and security
- **Regional support** for state reporting
- Exchange participants **influence** product development



The Exchange is a low-cost option for districts & charter schools

- Enroll in The Exchange at **no cost** through August 2025
- Access **best-cost options** from software providers
- Tools and applications offered on The Exchange can help identify **cost savings** opportunities

What you get:

- **Free access** to The Exchange through August 2025
- Training and access to **hands-on resources** to guide onboarding
- **Support** for state reporting submission validation
- Tools to ensure systems are connected and the right **data is flowing**
- **Customizable** dashboards
- An **online community** that includes districts and charter schools across Texas
- **Expanded reporting** capabilities
- The ability to **shape our products** for tools you will use

Exchange member expectations

Activities

- Appoint an Exchange implementation team
- Configure data sources to integrate with The Exchange
- Train users on Exchange tools
- Collaborate with your region to inform ongoing Exchange development
- Connect The Exchange with users to inform ongoing research

Estimated Time Commitment

- Executive Lead and Academic Lead - approximately 2 hours/week during initial implementation (30 - 40 hrs total)
- Tech and Data Leads - approximately 4 hours/week (60 - 80 hrs total)

Exchange Applications

Student Passport

- Product Highlights:
  - Request student information for students moving into an Exchange district
  - Review, fulfill, or decline student information requests
  - Communicate internally with other registrars

- Future Enhancement(s):
  - Expansion of the student information request
    - Graduation plan
    - Attendance
  - Ability to send historical data for select data points

Student Passport Video

Targeted Audience: *Registrars*

Edvise Reports

The Edvise reports pull together a wide range of information utilizing Texas Academic Performance Reports (TAPR) data. Performance is shown disaggregated by student groups, including ethnicity and socioeconomic status. The reports also provide extensive information on school and district staff, programs, and student demographics.
